Hana Biyori's Symbol Trees

<p>Palo borracho Scientific name: <i>Ceiba insignis</i> Country of origin: Paraguay Age: Estimated 400 years Location: Hana Biyori Hall</p> <p>Named a drunken (barracho) tree (palo) in Spanish, the tree grows naturally in abundance in Latin America.</p>	<p>Semper sequoia Scientific name: <i>Sequoia sempervirens</i> Country of origin: Western North America Age: Approximately 60 years Height: Approximately 30 meters Location: Sequoia Garden</p> <p>The name "sequoia" derives from Sequoyah, a Native American polymath of the Cherokee Nation who invented a Cherokee syllabary in 1821. There are sequoia trees that are nearly 100 meters in the United States.</p>

Everyday Is a Good Flower Watching Day!
Indoor Flower Gardens That Enchant You Anytime of Year

Besides Flower Chandeliers, or over 300 pots of plants hanging overhead in one of the largest scales of their kind in the Kanto region, the Hana Biyori Hall features flowers covering the floors and a wall flower garden 20 meters long and 2 meters high, providing flowers 360 degrees. Symbolizing Hana Biyori, there is a palo borracho tree in the hall estimated to be over 400 years old.

One of the largest collections of Flower Chandeliers in Kanto

PIET OUDOLF GARDEN TOKYO

This garden was designed by Piet Oudolf in August 2021, as his first garden in As. He is internationally known as the leader of the new perennial movement, which appreciate the full life cycle of the flowers and herbaceous plants through out the four seasons including seed-heads and died-body in winter time, in comparison the traditional gardening which intend to value the flower heavily. This is a show case featuring more sustainable approach to the gardening.
