

Backstory

The year is 2182. Welcome to the future of Earth.

My name is Lipovitan-man. I work on Earth's Lipovitan factory.

Taisho Pharmaceutical has launched their factory on the moon, where they're using the moon's unique environment to develop medicine.

It's also the home to the popular idol "Lipovitan Girl".

...but for some reason she seems really down today...

"Ah, my whole body feels so dully. I just can't anymore..."

W-wait a second,

Isn't that one of those tiredness monsters over there?!

It's a Dully!!

Dullies are monsters that use negative words to steal all the energy and fun out of people!

"Help me, Lipovitan-man! I need to drink Lipovitan D—!"

Next stop, the moon!

We'll make a fresh batch of Lipovitan D at the factory there

And head straight for the moon!

Hold on, Lipovitan Girl!

We'll be there soon with the energy you need!
